Work Experience

Panasa Technology | Software Developer   **Jul'23 - Nov'23**

- Designed easy-to-use payment and user registration pages for a dashboard, including over 50 features. This made our data work smoother, improving research by 5%.
- Managed to connect different software parts smoothly, making our system 2% faster after making it better. This helped our work run more smoothly.
- Led a team of 4 new software engineers, making sure they met tough standards.

Citiustech Healthcare Pvt. Ltd.| Software Engineer   **Nov'21 - Jul'23**

- Led the improvement of healthcare website pages using GE Healthcare Edison Design System (EDS) styles, resulting in a 25% increase in user engagement.
- Improved web page speed by 0.5x, making browsing better for users.
- Created tests to cover 85% of the code, making the apps more stable and reliable.
- Took part in the GE Healthcare Bug Bash event, helping to make operations 10% more efficient.

Education

National Institute of Science Technology, India   **2017 - 2021**

- Bachelor of Technology in Electronics and Communication Engineering | CGPA: **8.33 / 10**

Skills

1. Angular 2+	2. REST API
3. TypeScript	4. HTML5
5. CSS3	6. SASS
7. Javascript	

Projects

TextUtils - An Online text Conversion Tool   **Sept 23**

A versatile text manipulation tool designed to simplify tasks like word counting, character counting, and formatting while offering conversion options for uppercase, lowercase, and sentence case transformations. It also provides clipboard support, a download feature, and a text cleaning tool for enhanced user convenience.
